

DIPC research assistantship

The Donostia International Physics Center DIPC is currently accepting applications for a three-month research assistantship to work in the group of Dr. Luca Salassa. This is a unique opportunity for highly motivated researchers to develop a research career joining one of the DIPC high-profile research teams.

We are looking for a researcher with experience in biocatalysis to assist the group in the development of new photocatalytic materials for photochemotherapy. The contract is specifically aimed at recruiting a researcher capable of developing catalytic and photocatalytic assays under biologically relevant conditions. The ideal candidate should have experience with flavin chemistry and biochemistry. Please contact Dr. Luca Salassa (lsalassa@dipc.org) for more information.

Pay rate and salary will be decided in accordance with the level of education, knowledge, skill, and experience of the selected candidate.

Interested candidates please send an updated CV, a contact information, and at least one reference letter to postdoc@dipc.org, indicating Ref. 2017/8 in the application.

Next review of applications is scheduled for May 19th 2017. Applications will be evaluated by a Committee designed by the DIPC board on the basis of the following criteria (with point weights indicated in parentheses):

- CV of the candidate (40%)
- Adequacy of the candidate's scientific background to the project (40%)
- Statement of interest and reference letters (10%)
- Others: Diversity in gender, race, nationality, etc. (10%)

Evaluation results will be communicated to the candidates soon after. The position will only be filled if qualified candidates are found.
